ABHINAV

Software Architect and Creative Technologist

Location: Badlapur, India
Email: abhinav@abhinav.dev
GitHub: github.com/abhinav
LinkedIn: linkedin.com/in/abhinav

PROFILE

Systems-minded engineer focused on cloud architecture, resilient software, and thoughtful product delivery. Comfortable moving between platform work, frontend polish, and AI-assisted tooling when the outcome needs all three.

EXPERIENCE

Senior Software Engineer | Example Cloud Systems | 2023 - Present
- Designed distributed services for high-availability internal platforms.
- Improved deployment safety with better observability and rollback paths.
- Partnered across product, design, and platform teams on critical launches.

Software Engineer | Example Data Products | 2020 - 2023
- Built backend services and analytics tooling for operational workflows.
- Reduced manual support burden with internal automation and dashboards.
- Helped shape reusable engineering patterns across multiple teams.

SELECTED PROJECTS

AI Portfolio Engine | Personal Project
- Built an editorial portfolio system with motion, modular content, and reusable UI.
- Established a content-driven structure that supports future case studies.

Cloud Data Pipeline | Architecture Project
- Designed event processing flows for large-volume telemetry workloads.
- Balanced cost, reliability, and operational simplicity across environments.

SKILLS

Architecture: AWS, distributed systems, APIs, reliability
Languages: TypeScript, JavaScript, Python, Go
Frontend: React, Next.js, motion, design systems
Tooling: CI/CD, observability, automation, AI workflows
